

STATE OF DELAWARE STATE COUNCIL FOR PERSONS WITH DISABILITIES

MARGARET M. O'NEILL BUILDING 410 FEDERAL STREET, SUITE 1 DOVER, DE 19901

Voice: (302) 739-3620 TTY/TDD: (302) 739-3699 Fax: (302) 739-6704

April 5, 2010

Ms. Rita M. Landgraf, Cabinet Secretary Department of Health & Social Services 1901 North Du Pont Highway Administration Bldg., 1st Floor New Castle, DE 19720

Dear Secretary Landgraf:

I write on behalf of the State Council for Persons with Disabilities (SCPD) as a follow-up to the JFC testimony regarding the Division of Substance Abuse and Mental Health's FY 11 budget provided by Mr. Brian Hartman on behalf of the Council and other organizations (attached). In summary, the councils recommended the establishment of a task force to analyze the current mental health system and develop a plan for shifting resources to a more balanced community based service delivery system. SCPD endorses such a task force similar to the one already created for the elderly and people with physical disabilities and referenced in Section 175 of the epilogue of the proposed budget bill.

Thank you for your consideration.

Sincerely,

Daniese McMullin-Powell, Chair

State Council for Persons with Disabilities

Cc: Mr. Brian Hartman, Esq.

Ms. Kevin Huckshorn

Governor's Advisory Council for Exceptional Citizens

Developmental Disabilities Council

P&1/dhss mental health task force 4-10

MEMO

To:

Joint Finance Committee

From:

Brian Hartman, on behalf of the following organizations:

Disabilities Law Program

Developmental Disabilities Council

State Council for Persons with Disabilities

Subject: Division of Substance Abuse & Mental Health FY 11 Budget

Date:

March 3, 2010

Please consider this memo a summary of the oral presentation of Brian J. Hartman, Esq. on behalf of the Disabilities Law Program ("DLP"), Developmental Disabilities Council ("DDC"), and the State Council for Persons with Disabilities ("SCPD"). We are addressing one (1) overarching aspect of DSAMH's budget, the skewing of resources to institutional versus community programs.

In Governor Markell's January State of the State address, he stressed the need for longrange budgetary planning. He commented as follows:

While next year's budget requires our immediate attention, we must not govern only for the short term. We are here to make our State better for generations to come.

We view this emphasis on long-range planning as sound advice. Concomitantly, we encourage the JFC to consider the on-going fiscal imprudence of allocating a disproportionate amount of resources to an institutional setting. This is a chronic problem. In its 2007 report, the Governor's Task Force on DPC noted that "Delaware's rate of expenditures for community mental health services was only 45%, compared to the national average of 70%." This distorted allocation of funding remains in effect today. The FY11 proposed budget allocates only 44% (\$32.1 million) of the mental health budget to community support vs. 56% (\$40.6 million) to DPC.² Of the 14,000+ clients served in DSAMH contract and state-operated programs, 56% of funds will be spent on an institution serving a few hundred individuals.

¹Governor's Task Force on the Delaware Psychiatric Center, Final Report (December 18, 2007) at 49-50. [Attachment "A"] The Task Force was co-chaired by the State's former budget director, Pete Ross, and the current DHSS Secretary, Rita Landgraf.

²The relevant excerpt from the proposed FY 11 budget bill (S.B. No. 196) is included as Attachment "B".

Joint Finance Committee Page 2 March 3, 2010

The most recent national statistics underscore the disparity. Last year the National Alliance on Mental Illness ("NAMI") issued a comprehensive report, "Grading the States 2009 Report Card". Delaware received a grade of "D" for community integration. Moreover, Delaware ranked 5th in the Nation in the number of psychiatric hospital beds per 1,000 adults with serious mental illness.³

The anomaly reinforced by the budget is that many Division clients unnecessarily spend years in DPC simply because there is a lack of funded community options. We understand that there may be more than 70 individuals at DPC who could be transitioned to the community if supervised or supported housing options were available. DPC "length of stay" statistics paint a compelling picture of Delawareans unnecessarily languishing in the Center. The Governor's Task Force report observed that "the average aggregate length of stay for residential adult patients at DPC in 2006 was 2,130 days (5.8 years) compared to the national average of 869 days (2.4 years). This disparity has actually worsened since 2006. In 2009, the average length of stay for residential DPC patients was 2,682 days, i.e., 7.34 years! Federal SAMHSA statistics are corroborative. For DPC patients who reach the threshold of 1 year in the facility, the average length of stay is 3,379 days (9.25 years), almost double the national average.

Recommendations

We recognize that major shifting of resources from institutional to community options cannot be achieved "overnight". We also recognize that the budget epilog continues to authorize the Department, with the approval of OMB and the Controller General, to reallocate some resources to the community.⁶ However, statistically, progress towards shifting to a more community-based model is lagging. To "jump-start" the process, we recommend the establishment of a task force to analyze the current system and develop a "roadmap" for shifting to a more balanced mental health system. The Governor's proposed budget already creates such a task force for the aging and persons with physical disabilities with a report due by March 15,

³Relevant excerpts from the report are included as Attachment "C".

⁴Governor's Task Force on the Delaware Psychiatric Center Final Report (December 18, 2007) at p. 49. [Attachment "A"]

⁵SAMHSA Delaware 2008 Mental Health National Outcome Measures, Table 2. [Attachment "D"]

⁶A copy of Section 155 of the epilogue of the proposed budget bill (S.B. No. 196) is included as Attachment "E".

Joint Finance Committee Page 2 March 3, 2010

2011.7 The budget epilogue recites as follows:

Recognizing that Delaware has an obligation to establish a rational long term care system to prevent expensive and premature institutionalization and to insure Delaware's senior and disabled population who are able to remain in their homes and communities should receive services needed to remain as independent as possible, it is the intent of the General Assembly that a Task Force shall be formed to develop ...[an analysis of innovations in other states, services needs, and recommendations].

Delaware enjoys a committed and progressive DHSS Secretary, DSAMH Director, and provider network. We need to take advantage of available mental health expertise to conduct the same planning being undertaken to balance the service delivery system for persons with physical disabilities.

Thank you for your consideration of our comments.

Governor's Task Force On the Delaware Psychiatric Center

Final Report

December 18, 2007

Task Force Members:

Senator Margaret Rose Henry
Kevin Ann Huckshorn, R.N.; MSN,
Rita Landgraf (Co-Chair)
Representative Pam Maier
Dennis Rochford
Harold Rosen, M.D.
Peter Ross (Co-Chair)
Yvonne Stringfield, Ed.D; R.N.
Gary Wirt, Ed.D

Created by:

Executive Order 100 August 17, 2007

Stuff:
Brian Posey; AARP
Lisa Schieffert, DHSS
Keith Warren, Office of the Governor
Andrea Summers, Office of Highway
Safety, Dept. of Safety and Homeland
Security

- The Task Force recommends that a utilization review (UR) process be initiated that is managed by an independent community contractor not otherwise involved in the DSAMH system of care. This UR process should mirror the kind of UR performed by other community hospitals and managed care insurers and would provide the state with daily reports regarding people admitted to DPC who no longer meet criteria for this level of care. The above recommendations should alleviate this scenario and would afford the state a comprehensive planning process, which is cost-effective and ensures that the appropriate level of care is provided.
- For DPC to better reflect their actual length of stay, data needs to be analyzed based by patient population inclusive of Forensic Unit (Mitchell), Long Term Care Unit (Carvel), Acute Care Unit (K-3) and Intermediate Care Units (K-S). The average aggregate length of stay for resident adult patients at DPC in 2006 was 2,130 days compared to the national average of 869 days. CMHS reports that in 2006 Delaware's rate of expenditures for community mental health services was only 45%, compared to the national average of 70%.

III. Funding Considerations

A. National and Historical Perspective

As states steadily shift from a delivery system focused on inpatient services to one of community-based service, this movement has been reflected in their mental health budgets. A national study (NASMHPD Research Institute, 2005) shows dramatic changes in the allocation of total state mental health agency expenditures in the United States between 1993 and 2003. For example:

In 1993

- --48% of mental health budget expenditures were allocated to state psychiatric hospital inpatient services
- --49% of expenditures were allocated to community-based services

By 2002

- --29% of expenditures were allocated to state psychiatric hospital inpatient services
- --69% of expenditures were allocated to community-based services

Delaware's allocation of resources today is similar to that of the U.S. in 1993. In 2005, Delaware's spending on community-based services for the same time was 45%. It is difficult to know what Delaware's total community costs are as the state's Medicaid service costs are not included. It may be that with the addition of these Medicaid community mental health expenditures that DE's community funding is higher than 45%, which would change these ratios. Most states include Medicaid expenditures when reporting these costs.

- The Task Force recommends that an explanation regarding why inpatient service costs are not being shared by Medicaid needs to be provided. It should also be noted that the 45% of spending on community-based care includes funds to support the involuntary commitments to community psychiatric hospitals such as Rockford Center, Meadowwood and Dover Behavioral Health. The use of state general revenue funding for private psychiatric beds in the community needs to be reviewed. Medicaid generally pays the cost of psychiatric care when that care is provided in a general medical facility.
- The Task Force recommends that all efforts need to be taken to access these federal dollars to help support these very expensive hospital beds. Also, the actual per bed day costs need to be described in order to assure that the state is not overpaying for these beds. Costs per bed should reflect the costs paid by managed care providers for these same services for their covered populations.

B. Recent Delaware Budgetary Practices

- The Task Force recommends that Delaware's budgetary allocations for community support services keep closer pace with the ongoing need, and that the community support service system receive inflationary increases to sustain their current level of services. The Task Force recommends a dedicated % of increase be provided to providers on an annual basis that is reflective of inflationary measures and/or the CPI. Between 2001 and 2007, private providers received less than 4% in contractual increases. During this same timeframe, the consumer price index increased by approximately 30%. Rates for services, many of them set in 2001, have not be re-evaluated for increases. Providers have indicated this lack of increase has a direct impact on the delivery of service. Many have increased the number of individuals being served assigned to a staff member, resulting in a less intensive service for those with the most significant conditions. DE community mental health providers testified that they have not been able to provide cost of living increases for their employees for many years and that these same employees are still limited to mileage reimbursement that is almost 50% less than the federal rate. Such erosion of community-based services can lead to increased use of unnecessary hospital care. The non-state community providers have voiced that since 2001, community-based services have actually eroded. The Legislature last appropriated funds for group homes in the FY01 and FY02 budgets. Funds for supervised apartments were included in FY01, 02, 06, 07 and 08 budgets. As a result, the Division's inventory of supported housing is limited to fourteen (14) group homes (serving 114 residents) and eight (8) supervised apartment programs. The combined capacity of the entire residential system is only two hundred nine (209) clients statewide.
- The Task Force supports the movement of the 35 patients to community-based services and the dedicated funding associated with this movement to adequately support those transitioning from DPC to community. This movement will bring the community residential placements to 244 and hospital census 210, if average

Consu

Grading the States 2009 Report Card: Delaware

In 2006, Delaware's mental health care system received a grade of C. Three years later the grade has dropped to a D, in part because of the lack of consumer-run programs and limited efforts to reduce the criminalization of people with mental illness. Full narrative (PDF).

Grades by Category (PDF)

Detailed Score Card

I. Health Promotion and Measurement: D Grade

25% of Total

Basic measures, such as the number of programs delivering evidence-based practices, emergency room wait-times, and the quantity of psychiatric beds by setting.

II. Financing & Core Treatment/Recovery Services: D Grade

A variety of financing measures, such as whether Medicaid reimburses providers for all, or part of evidence-based practices; and more.

III. Consumer & Family Empowerment: F

15% of Total

Grade

Includes measures such as consumer and family access to essential information from the state, promotion of consumer-run programs, and family and peer education and support.

IV. Community Integration and Social Inclusion: D

15% of Total

Includes activities that require collaboration among state mental health agencies and other state agencies and systems.

Innovations

- New state leadership
- Mobile crisis intervention teams
- Integrated dual diagnosis treatment

Urgent Needs

- Implement state hospital investigation recommendations
- Supportive housing
- 屬 Consumer-run programs
- Jail and prison reentry programs and CIT

On the inpatient side, NAMI's review of data on psychiatric beds from the American Hospital Association's annual survey reveals that there are about 113,988 psychiatric beds for adults across the country (see Table 3.3).²⁴ This is down from an estimated 126,849 beds in 2000, and 197,139 beds in 1990.²⁵

Looking at the availability of beds per capita, there are 10.8 beds per 1,000 adults with serious mental illness. Across states this ranges from more than 15 beds per 1,000 adults with serious mental illness (in DC, New Jersey, Mississippi, New York, Delaware, and Nebraska) to fewer than eight (in Arizona, Florida, Rhode Island, Michigan, Nevada, South Carolina, Montana, and Ohio). 26

As with ACT, there is little consensus on the minimum number of psychiatric inpatient beds communities should have available. One recent study suggests a minimum of 50 public psychiatric beds per 100,000 residents (which translates into roughly 9.3 beds per 1,000 adults with serious mental illness). ²⁷ But even this suggested minimum threshold assumes that effective community-based services and assisted outpatient treatment programs are available, which is not the case.

Furthermore, NAMI's estimates include private psychiatric hospital beds (about 16 percent of the total) and forensic beds (i.e., beds for individuals who are awaiting trial, determined by the court to be incompetent to proceed

to trial, or who are found not guilty by reason of insanity). In some states, such as California, the vast majority of state public psychiatric beds are forensic beds, meaning very few "civil" beds are available.

States must have an adequate mental health workforce to deliver critical services. Analyses of the mental health workforce by the Sheps Center document significant shortages across the country: while only one in five counties (18 percent) has an unmet need for nonprescribers, nearly every county (96 percent) has an unmet need for prescribers. In examining and scoring workforce availability, NAMI ranked states according to the severity of their mental health workforce shortage and divided them into four equal groups (or quartiles). States with the highest shortages got the lowest score for "workforce availability" and vice versa. With 96 percent of all counties experiencing prescriber shortages, it is clear that even states in the top quartile for workforce availability are still experiencing shortages.²⁸

Where can innovative practices be found?

- Rhode Island has expanded its ACT program with the addition of RI ACT II—a less resource-intensive model for individuals who do not need the full level of ACT services. Ohio funds a forensic Assertive Community Treatment (F-ACT) team that serves people with serious mental illness upon release from prison.
- The Georgia Crisis and Access Line (GCAL) is an innovative mechanism for tracking available psychiatric beds. A toll-free, 24/7 phone service staffed by licensed clinicians who can make appointments anywhere in the state, GCAL tracks (in real time) the state's psychiatric bed capacity and works with emergency departments across the state to ensure people in need have access to available beds.

Finding #3: States are Not Ensuring their Service Delivery is Culturally Competent

As noted in Chapter 1, research confirms that people from minority racial and ethnic communities have less access to mental health services, are less likely to receive these services, and often receive poor quality care in treatment.

Arizona, Arkansas, Georgia, Iowa, Kentucky, Louisiana, Missouri, Nevada, New Mexico, Tennessee, Utah, Vermont, and Washington (fewer than three per thousand) and Alaska, Mississippi, Kansas, North Dakota, and Wyoming (no ACT or ACT teams reported).

²⁴ The AHA surveys all hospitals in the United States, and identifies these hospitals from multiple sources including state hospital associations, the Joint Commission, and the Centers for Medicare and Medicaid Services. Because their database includes information on the total number of staffed beds *even for hospitals that do not respond to their survey*, we are confident that the majority of the beds in state psychiatric hospitals are captured in their data. The data also include inpatient psychiatric beds in other state- and county-owned hospitals and non-profit and investor-owned community-based hospitals.

²⁵ None of these figures include beds in federal (VA and other) hospitals, of which there were about 4,700 in FY 2007. Estimates for 2000 and 1990 are from Table 19.2 in Ronald W. Manderscheid and Joyce T. Berry (eds.), *Mental Health, United States*, 2004 (Rockville, MD: Substance Abuse and Mental Health Services Administration, DHHS Pub No. (SMA)-06-4195, 2006). Available at http://mentalhealth.samhsa.gov/publications/allpubs/sma06-4195/chp19table2.asp.

³⁶ For scoring purposes, NAMI looked at the distribution across all states of adult inpatient psychiatric beds (per 1,000 adults with serious mental illness) and divided states into four equal groups (or quartiles). States in the top-most quartile (with the most beds per capita) were: DC, New Jersey, Mississippi, New York, Delaware, Nebraska, Connecticut, Massachusetts, Wyoming, Missouri, South Dakota, Maryland, and North Dakota. States in the bottom-most quartile (with the fewest beds per capita) were: Colorado, Texas, Vermont, Oregon, Washington, Ohio, Montana, South Carolina, Nevada, Michigan, Rhode Island, Florida, and Arizona.

³⁷ E. Fuller Torrey et al., *The Shortage of Public Hospital Beds for Mentally Ill Persons* (Arlington, VA: Treatment Advocacy Center, 2008). This assumes an overall prevalence rate for serious mental illness of 5.4 percent.

²⁸ States with the most severe shortages are: Alabama, Arkansas, Idaho, Indiana, Iowa, Mississippi, Nebraska, Nevada, South Dakota, Texas, Utah, West Virginia, and Wyoming. States with the least severe shortages (relative to other states) are: California, Connecticut, DC, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Rhode Island, Vermont, and Virginia.

Section 156. Section 1 of this Act provides an appropriation of \$100.0 ASF to the Department of Health and Social Services, Substance Abuse and Mental Health, Community Mental Health (35-06-20). Substance Abuse and Mental Health expects to generate additional retroactive revenue as a result of the Tax Equity and Fiscal Responsibility Act (TEFRA) rebasing of Medicare payment rates at Delaware Psychiatric Center. These funds shall be used to fund the rebasing project and support the Division of Substance Abuse and Mental Health programs, including but not limited to purchasing medicines for clients.

Office of Management and Budget and the Controller General. These reallocation initiatives shall not

compromise the standard of care of the remaining Delaware Psychiatric Center population.

Section 157. The Merit Rules notwithstanding, Department of Health and Social Services employees designated as Psychiatrists, as well as the Chief Psychiatrist in the Delaware Psychiatric Center (35-06-30) shall be eligible for standby pay and call back pay.

Section 158. Section 1 of this Act provides an appropriation of \$1,200.0 ASF to the Department of Health and Social Services, Social Services (35-07-01) for TANF Cash Assistance Pass Through. The division shall be allowed to collect and deposit funds into this account as a result of child support payments collected by the Division of Child Support Enforcement on behalf of TANF clients. These funds will be used by the DSS to make supplemental payments to clients who are eligible to retain a portion of their child support under State and Federal TANF budgeting rules.

Section 159. Section 1 of this Act provides an appropriation to the Department of Health and Social Services, Substance Abuse and Mental Health, Delaware Psychiatric Center (35-06-30), for Contractual Services. Of that amount, \$41.2 shall be made available for a Direct Patient Care Intern Program to enable direct care professionals to take courses to increase their skills in specialty areas.

1	additional services for adults with physical disabilities. Such services are not to exceed the estimated
2	annualized revenue, and are subject to initial and on-going review by the Director of the Office of
3	Management and Budget and the Controller General.
4	Section 174. Section 1 of this Act makes an appropriation to the Department of Health and Social
5	Services, Services for Aging and Adults with Physical Disabilities (35-14-00) for Respite Care. Of that
6	appropriation, \$110.0 is appropriated to support families provided respite care services through the
7	Caregiver Program.
8	Section 175. Recognizing Delaware has an obligation to establish a rational long term care
9	system to prevent expensive and premature institutionalization and to insure Delaware's senior and
10	disabled population who are able to remain in their homes and community should receive services needed
11	to remain as independent as possible, it is the intent of the General Assembly that a Task Force shall be
12	formed to develop the following:
13	(1) A summary analysis of all existing studies on the subject of long term care housing needs
14	for Delaware's Aging and Disabled population;
15	(2) An analysis of programs and innovations in other states that have maximized consumer
16	choice in the selection of a setting in which to receive long-term care services and
17	supports and their ability to be replicated in Delaware;
18	(3) An analysis of service needs required for individuals to receive long term care in their
19	homes and community, including an analysis of the supply of organizations providing
20	services and existing or anticipated gaps in services required for home or community
21	living;
22	(4) An analysis and recommended actions the State of Delaware should consider to increase
23	consumer options and ability to choose and to support long term care housing needs for
24	individuals, including affordable and accessible housing and home and community based
25	service required by individuals who desire to receive long term care services in home and
26	community;

1	(5) An analysis of publicly subsidized and other affordable housing options in Delaware and
2	their role in providing home and community based services to older people and people
3	with disabilities; and
4	(6) An analysis and recommended actions regarding projected demand for skilled nursing
5	facility care.
6	The Task Force shall be chaired by the chair, vice-chair, or other committee member designated
7	by the chair of the House Joint Finance Committee, and, in addition to its chair, that the chair appoint the
8	following Task Force members:
9	(1) one member of the House Health and Human Development Committee;
10	(2) one member of the Housing and Community Affairs Committee;
11	(3) Delaware's Long Term Care Ombudsman;
12	(4) one representative of the American Hospital Association;
13	(5) one representative of the Delaware Healthcare Facilities Association;
14	(6) one representative of AARP;
15	(7) one representative of Delaware's physical disabilities community;
16	(8) one representative from Delaware Medicaid's Money Follows the Person leadership
17	team;
18	(9) one representative from the Division of Aging and Adults with Physical Disabilities;
19	(10) one representative from the University of Delaware's Center for applied
20	Demography and Survey Research;
21	(11) one professor of aging from an accredited Delaware University;
22	(12) one representative from a Delaware Home Health Agency;
23	(13) one representative from the Delaware Aging Network;
24	(14) one representative from the Delaware Nursing Home Quality Residents Assurance
25	Commission;
26	(15) one member from the United Way of Delaware; and
27	(16) staff support will be available through AARP.
28	The Task Force will report on its findings to the General Assembly no later than March 15, 2011.
